PROFESSIONAL SUMMARY

I am a highly analytical and technically grounded professional with a strong foundation in full-stack programming, logic engineering, and software architectures. Combining robust experience in object-oriented structures, databases, and cloud infrastructure, I specialize in checking system robustness, defining clean code workflows, and identifying edge cases. I am adept at translating complex logic into automated frameworks, leveraging deep problem-solving skills to audit quality, reduce development bottlenecks, and optimize software reliability.

SKILLS & COMPETENCIES

- Technical & Programming Foundations:** Proficient in Java, PHP, JavaScript, HTML, CSS, and MySQL; deeply skilled in object-oriented programming, data structures, and test automation engineering.
- Testing & System Auditing:** Designing core verification scripts, parsing application data flows, validating visual layout integrations, executing edge-case scenario evaluations, and UI UX designer competencies.
- Cloud Systems & Infrastructure:** Certified AWS Cloud Practitioner with a deep understanding of software development lifecycles (SDLC), Linux environments, secure data pipelines, and serverless hosting setups.
- Business & Interaction Tooling:** Experiencing working with Salesforce, Cybersource, corporate data synthesis, CRM configurations, and technical error diagnostics.
- Team & Agile Practices:** Adept at working in Agile/Scrum environments, managing relationships with cross-functional stakeholders, and resolving cross-system compatibility hurdles.
- Languages:** Fluent in both written and spoken English and Swahili.

PROFESSIONAL EXPERIENCE

- | | |
|--|--------------------------|
| Ecosystem Customer Product Advisor | September 2024 - Present |
| <i>NCBA Bank - Retail Sales Department</i> | |
| <ul style="list-style-type: none">• Teamed up closely with marketing, product, and service units to coordinate market activations and ensure new financial solutions hit the ground running with consistent strong performances.• Listened directly to customers to pick up on behavior patterns and pain points, transforming real-world feedback into useful insights that help management improve digital platform journeys.• Managed daily client relationships and customer accounts with high attention to detail, maintaining strict KYC compliance and delivering sharp service well within our turnaround timelines.• Kept my skills continuously updated through banking product training and digital solution courses to stay ahead of changing customer habits and market trends. | |

Freelance AWS Cloud Consultant

February 2024 - August 2024

Independent

- Designed and fine-tuned efficient, cost-conscious cloud spaces for clients, making sure their software setups ran smoothly and reliably.
- Guided clients through technical cloud transitions, acting as a clear-spoken advisor who maps complex architecture back to real business goals.
- Ran targeted research to identify common customer pain points, spotted fresh feature opportunities, and hosted product training sessions to make technical systems easy to use.

Full-Stack Designer & Marketer

April 2023 - February 2024

Corium Connect

- Owned the complete creative process from mapping out visual layouts and coding interactive front-ends to building dynamic marketing experiences for all company initiatives.
- Sat down directly with clients to figure out their exact needs, untangle confusing usability roadblocks, and build functional, eye-catching digital interfaces.
- Studied market dynamics to understand what users actually look for in a product, helping the team frame and execute smart sales and digital strategies.

Teaching Assistant - Department of Computer Science

September 2021 - December 2022

University of Nairobi

- Mentored students and handled assignments for Data Structures & Algorithms and Object-Oriented Programming, reinforcing core logic and flow.
- Led interactive weekly study sessions to break down application mechanics and digital data structures, helping students clearly understand how software interacts.
- Collaborated with faculty to iterate on course structures, working to present dense technical blueprints in highly approachable, intuitive steps.

Team Collaborator

May 2015 - August 2016

Bata Shoe Company Limited

- Worked inside a tight operational team to handle high-volume product picking, precise record management, and dispatch reporting.

EDUCATION

Bachelor of Economics

2015 - 2022

University of Nairobi

Certified AWS Cloud Practitioner

Certified

Amazon Web Services (AWS)

Kenya Certificate of Secondary Education (KCSE)

2010 - 2013

Maranda High School
